Marcom

Dear Sir George Marcom

I have not been  
fortunate enough to  
meet you again since  
the time (about a year  
ago) when I had  
the pleasure of  
enjoying your hospitality  
in New York

DSI

knowing of the interest  
you take in the subject  
of Wireless Telegraphy I  
am particularly  
anxious to have the  
privilege of meeting  
you again in order  
to be able to talk

over some matters  
connected with the  
new method of communication

I shall be in town  
all this week and  
would be very glad  
to call on you any  
time, if you would  
be so good as to  
let me know where

be of some benefit to  
my company.

Hoping you will kindly  
accept my apologies for  
the awkward position ✓

have placed myself in

I remain

Yours sincerely,

G. Marconi

Dear Lady Inan Smith.

I write to explain  
a difficulty into which  
I have got myself into  
(entirely through my own fault)  
and which refers to your  
kind invitation to dinner

for Tuesday.

A few days ago Lord  
and Lady Selborne, whom  
I met at a party, asked  
me if I would dine with  
them at the Admiralty on  
Tuesday evening to meet  
some other members of the  
government which are  
interested in the negotiations

now being carried out  
by my company. Quite  
forgetting that I was to  
to dine with you I accepted  
Lord Selborne's invitation, and  
I have only ~~just~~ found out  
with dismay my mistake.

I now write to ask you  
if you could let me off  
my engagement for  
Tuesday as perhaps the  
meeting at the Admiralty  
that evening may indirectly

67 Zaphod Road

Dear Prof. Compton

I am very much  
obliged to you for your  
kind letter of yesterday's date.

I much regretted  
that you could not  
be present at the reading  
of my paper yesterday evening  
but trust you will be

present next Thursday and  
take part in the discussion.

I met with a very  
friendly reception and  
the interest taken in  
my paper was very great  
indeed.

I made no attempt  
to go into the theory  
of the system but tried  
to convince the Just  
that telegraphy through

space over distances of about  
20 miles was now a very  
easy matter.

The motive that made  
me dwell so much on  
the practical applications  
was that I believed  
that the practicability  
of working was doubted  
by many who had not  
like myself had the  
opportunity of carrying out  
experiments on a large scale  
Hoping to have

DAILY MAIL

London.

Dear Mr Wilson,

I duly received your letter of the 16th instant, which I am sorry has not been answered earlier, as it reached me after some delay. I cannot say when I shall next be in London, but when I am next there I shall be glad to have a talk with you as you suggest. I am afraid we are too busy with naval work just now to be able to fit up an installation at Portsmouth for your local paper there.

With kind regards,

I am,

Yours very truly,

G. Marconi

Sig. Olindo Leonardo Spada  
Corso d'Italia, 29  
R o m a

Egregio Sig. Spada,

Le sono grato per le cortesî frasi  
espresse nella Sua lettera del 20 c. m. riguardo alla  
mia opera.

Allo stato attuale della radio-tecnica  
non è possibile effettuare trasporto d'energia motrice  
attraverso lo spazio utilizzando il principio attivo del  
le radio-trasmissioni. Tutto quello che attualmente si  
può ottenere in tale campo, applicato alle utilizzazioni  
di forza motrice, è il comando a distanza di motori e  
apparecchi direzionali, i quali però siano alimentati  
con energia motrice propria.

Con il perfezionarsi della scienza ra-  
dio-tecnica si potrà forse un giorno ottenere il tras-  
porto dell'energia motrice a distanza senza il sussidio  
di conduttori.

Distinti saluti

S. Marconi

## OBSERVATIONS

1) L.a.s. 4 p.8°, London, 8.III.1903,  
an Lady Swan Smith, welche er bittet  
ihn seines Versprechens zu entheben,  
ihrer Einladung für Dienstag zum  
Speisen Folge zu leisten. Er hat  
übersehen, für diesen Abend bereits  
Lord Selbourne zugesagt zu haben,  
der auch einige Mitglieder der Re-  
gierung eingeladen hat, welche sich  
für die Verhandlungen interessieren,  
die jetzt seine Gesellschaft führt,  
sodass dieser Abend für sie von ei-  
niger Wichtigkeit werden könnte.

2) P.a.s. 1 p.8°, Venezia, 8.9.1932,  
auf dem Briefpapier der berühmten  
Yacht Marconi's „Elettra“,  
links die Flagge derselben.  
„With all good wishes Guglielmo  
Marconi“.

Die Eintragung stammt aus dem  
Stammbuch des Weltreisenden  
Kundinger.

M A R C O N I , Guglielmo -  
Physiker.

Geb.25.IV.1874,Griffone b.Bologna

Erfinder der drahtlosen Funkentele-  
graphie, studierte in Bologna und  
führte dort seine ersten Versuche  
mit drahtloser Telegraphie aus.Dann  
wurden zwischen Penarth und Weston  
in England grössere Experimente un-  
ternommen, die später durch das ita-  
lienische Marineministerium in Spe-  
zia fortgeführt worden sind. 1897  
gründete er die „Marconi's Wireless  
Telegraph Cy Ltd.“, welche die  
drahtlose Verbindung zwischen Eng-  
land und Frankreich herstellte./1899  
Nach dem Kriege schuf er die Kurz-  
wellensender. Aufsehen erregte im  
Frühjahr 1930 das erfolgreich durch-  
geführte Experiment, von Genua aus  
durch drahtlose Uebertragung das  
Rathaus in Sidney elektrisch zu be-  
leuchten. Er ist der Inhaber zahl-  
reicher Titel, Orden und Auszeich-  
nungen und erhielt 1909 gemeinsam  
mit Ferdinand Braun den Nobelpreis  
für Physik „als Anerkennung der Ver-  
dienste um die Entwicklung der draht-  
losen Telegraphie.

Friendly letter declining an invitation to lunch "as we have to be in Wales all that week". Marconi was the first to send wireless messages in 1897. He did so between Penarth and Weston.

Li 28 Luglio 1928

Sig. Olindo Leonardo Spada  
Corso d'Italia 29  
R o m a

Egregio Sig. Spada,

Thank you for the courteous sentences expressed in your letter of the 20th regarding my work.

In the present state of radio-technique, it is not possible to effect transport of motor energy across space, utilizing the active principle of radio-transmissions. All that which is presently possible to obtain in this field, applied to the utilizations of motor power, is the command at a distance of motors and directional apparatus, which however are fed by precise motor energy.

With the perfecting of the science of radio-technique, perhaps it will some day be possible to obtain the transport of motor energy at a distance without the help of conductors.

Greetings,

G. Marconi
